PROJECTS

HealthCare Application | [GitHub](#)

Flutter

- A mobile application built with Flutter to help users manage their health and access healthcare services easily.
- Features may include appointment scheduling, doctor consultations, health records management, and reminders for medications or checkups.
- Designed to provide a user-friendly, cross-platform experience on both Android and iOS, leveraging Flutter's fast and responsive UI framework.

Dairy Management | [GitHub](#)

C#

- A desktop Dairy Management System built in C# using the .NET framework to digitally manage dairy farm operations.
- The application helps maintain and track daily dairy work, like managing milk collection, records, and related data effectively
- Designed as a stand-alone Windows app, it replaces manual record-keeping with a structured software solution for dairy business workflows.

EXTRA-CURRICULAR
